

SynBioVit

PROBIOTIC FOR HINDGUT HEALTH

SynBioVit is a complementary feed for horses containing live yeast *Saccharomyces Cerevisiae*, probiotics and B Vitamins.

900GM

Saccharomyces Cerevisiae increases nutrient digestibility by enhancing the activity of fibre-digesting bacteria in the hindgut, resulting in increased fibre digestion of forage and more efficient use of the vitamins and minerals from the diet.

Prebiotics act as a food substrate for beneficial microbial populations in the hindgut.

B vitamins are key nutrients involved in metabolism and energy release. When horses suffer gut disturbances their low hindgut bacterial population may affect the ability of the horse to synthesise B vitamins.

Nutritional Composition

Fructo-oligosaccharides, Mannan-oligosaccharides, Calcium Carbonate, Maize, Starch, Dextrose, Inactivated Yeast.

Additives

Per 1kg: Niacinamide 5,000mg, Vitamin B1 3,333mg, Vitamin B2 2,500mg, Pantothenic acid 2,000mg, Vitamin B12 33,000mcg.

Digestibility Enhancer: *Saccharomyces Cerevisiae* (CNCM I-4407) 1.67×10^{12} cfu.

Analytical Constituents

Crude Protein 14.4%, Crude Fat <0.5%, Crude Ash 16.9%, Crude Fibre 0.4%, Sodium 0.0449%, Calcium 6.15%.

Instructions for Proper Use:

SYNBIOVIT should be added to the normal feed ration.

All Horses: Feed 20g per day.

SYNBIOVIT can be used as a nutritional adjunct:

- During times of stress: travelling, competing, illness.
- After antibiotic treatment, when hindgut bacterial populations have been diminished.
- Young horses with incomplete bacterial populations.
- For horses moving stables or starting a new feeding regime.

For Maintenance of healthy digestion and gut function feed 10g per day
